 **QUOTE ME TODAY**

# COMPARE COVER AND PRICES

Comparing prices and cover levels is a must when it comes to finding a great deal. That's where a broker comes in handy. We'll compare policies on your behalf, matching you with a carefully selected insurer so you can be confident you're protected, all at a fair price.

## GAIN ADI EXPERIENCE

PDI's serve a 6 month probation period and are a higher risk than ADIs, meaning higher insurance costs. Once you've passed, your insurance costs should lower as you gain experience.

## CONSIDER SETTING A HIGHER EXCESS

If there is an option to set a higher excess, this can help to reduce the premium, as you would be contributing more to any claims made against the policy. This reduces the level of risk and expenditure for the insurer.

# KEEP YOUR CAR OFF ROAD IN A SAFE AREA

Where you store your vehicle overnight will affect the premium on your policy. Areas with higher crime rates and thefts carry a higher risk to the insurer and the price will reflect this. Keeping your vehicle off road will help as there is less likelihood of the vehicle being stolen or damaged by a third party vehicle.

# IS YOUR VEHICLE THE PROBLEM?

Your policy is partly rated on the vehicle details, which includes the year of manufacture, engine size and claims statistics. Changing your vehicle can have an impact on the premium, and whilst a newer vehicle may cost more up front, it will likely be more fuel efficient and reliable than an older model.
