Why you should consider cyber insurance

QMTCOMMERCIAL
INSURANCE BROKERS

Every business is vulnerable

The Cyber Security Breaches Survey 2025 revealed that 43% of UK businesses and 30% of charities experienced cyber attacks in the last 12 months.

No business, regardless of size, is immune to digital threats.

It's easy to miss the signs

Cybercriminals often exploit the fact that you and your team may not always recognise the signs of a cyber attack.

You'll want to act swiftly

Prompt and effective response to a cyber attack can significantly reduce the potential long-term impact on your business.

Protect your reputation

Imagine the chaos of a cyber attack locking you out of your essential IT systems. The disruption and damage to your reputation could be immense.

Build trust with third parties

Cyber insurance provides customers with the assurance that protection measures are ready to respond effectively in the event of a cyber attack.

Need help with your insurance?

Our team of friendly advisors
are here to support you, whether
you need a quote or have a query.
